This cookbook invites you to explore the world of the potato anew, making this modest root shine with old splendor through new recipes.

Tater, spud, earthapple, tuber, murphy – there are many names for the potato, and even more varieties of this “unfathomable blessing, emerging from the soil” (Goethe).

Hardly any other side dish evokes such an abundance of memories: grandma’s juicy potato salad, mum’s crispy potato fritters or the taste of the slightly too salty chips at the public pool. Yet hardly any other food is so vastly misjudged regarding its quality and variety.
